

The American Institute of Architects Continuing Education System

AIA/CES Registered Provider Program Summary Handout

Provider: Polished Concrete Images **Length:** 1 Hour

Program: PCI101 **Credits:** 1 LU Hour

Program: Polished Concrete:
Changing the Flooring Industry **HSW:** NO

Description: Polished concrete has become a flooring solution for commercial, industrial, and residential settings. This course will cover the many aspects of a mechanically ground and polished concrete floor.

Learning Objectives: At the end of the program the participants will understand the installation process, benefits, and characteristics for a mechanically ground and polished concrete floor, as well as distinguish the difference between the various floors known as "polished concrete."

How Taught: The CES facilitator utilizes a PowerPoint presentation to provide an in-depth overview of a mechanically ground and polished concrete floor. An accompanying handout will increase the learning experience. The program

concludes with a review and a Q&A session to clear up any final questions.

A/V Needed: Electrical power and a screen for the PowerPoint presentation. (The CES facilitator supplies the laptop and projector.)

Target Audience: Architects, specifiers, owners and other design professionals in the commercial, industrial, or residential market. The ideal audience size can be one on one or over 50. This program meets every experience level with time designed into the program for questions and answers.

Facilitator Qualifications: All Polished Concrete Images CES facilitators have been trained on CES guidelines and presentation skills. In addition, they receive continuous in-depth training on products, techniques, and specifications of polished concrete.
